

Program Name: photocontest.xyz

Location: Side Project

- Description:
 - Found a PHP project on git hub and modified it for my needs
 - Photo content website allows people to upload and submit photos
 - When photo is submitted it is added to the database but not allowed on homepage until approved by a moderator.
 - Each photo has a shorten GUID so that it can be shared via social media
 - Users can vote once per day and that is controlled by browser fingerprinting.
 - Made it flexible and usable by any non-profit organization.
- Improvements
 - When a photo is submitted an email is sent to the user and the moderators
 - Front page is images are randomized on each refresh
 - Added custom pages for each dog. (just a filter of the homepage)
